PROJECTS

AI Customer Support Assistant | n8n, Google Gemini, Google Sheets, Gmail

- Built a self-hosted n8n workflow that classifies customer messages with Gemini (category, sentiment, urgency, confidence) and drafts replies from an FAQ using RAG.
- Added Gmail alerts for urgent messages and a human-review flag for low-confidence cases.
- Evaluated the urgency prompt on 25 self-written test messages across 3 versions (urgent accuracy 19/20, 22/25, 25/25); added retry and a separate error-alert workflow.

n8n AI WordPress Publisher | n8n, Gemini API, WordPress REST API, Docker

- Built an automation that turns topics from Google Sheets into articles with Gemini and creates WordPress drafts automatically.
- Configured Rank Math SEO metadata and FAQ blocks within the generated drafts.
- Containerised the setup with Docker and version-controlled it on GitHub.

SmartDine AI | React.js, JavaScript, HTML, CSS, Gemini API

- Developed the front end of an AI-powered dining platform with smart table reservation, group dining and split billing.
- Integrated Gemini API features including mood-based food recommendations, recommendation reasons and nutrition-related AI.
- Deployed the application on Vercel.

Designmodo Website Clone | React.js, HTML, CSS, JavaScript

- Built a fully responsive multi-section website from scratch.
- Recreated the original site's layout and sections with React.js, HTML, CSS and JavaScript, keeping the design consistent across desktop, tablet and mobile screens.
